

13 Wallpaper Trends Designers Can't Wait to Try in 2023

As we've seen with [2023 color trends](#), things are warming up. Minimalism and all-gray-everything are becoming a thing of the past, and in their place, bolder colors and bigger patterns are taking hold. It's no surprise that with this change, wallpaper is having a major moment.

We turned to the experts to ask which trends they see taking center stage when it comes to papering our walls in 2023.

For a while, wallpaper felt old-fashioned and dated. But, as designer Stephanie Lindsey of [Etch Design Group](#) says, people are leaning back into the classics now. “We are seeing classic patterns and colors come into play,” she says. “With retro elements coming back into style, wallpaper complements that as well.”
